

PRODUCT DATA SHEET

DF-T Defoamer for Oil Well Cementing**Product Description**

DF-T eliminates bubbles through reducing the surface tension of liquid.

Characteristics

- DF-T is the ester defoamer.
- Non-poisonous, non-odor, and non-corrosivity and has no harmful influence on the environment.
- Normal dosage: 0.1%~0.3% (BWOC).
- With anti foam, anti foam, anti gas channeling function. Eliminate bubbles quickly.
- Has acid and alkali resistance, high temperature resistant.
- Good compatibility with other additives.
- Have no adverse effect on other properties of cement slurry.

Technical Specification

Items	Specification
Appearance	Homogeneous liquid
Cement slurry density recovery rate,%	≥90.0
Formula of cement slurry:	
Cement slurry system formula: G grade oil well cement 600g, water 264g.	
Foaming cement slurry system formula: G grade oil well cement 600g, drag reducer USZ 3.0g, 120 mesh polyvinyl alcohol 3.0g, water 264g.	
Formula of defoaming cement slurry system: G grade oil well cement 600g, drag reducer USZ 3.0g, 120 mesh polyvinyl alcohol 3.0g, defoamer DF-T 0.6g, water 264g.	
Water quality: distilled water.	

Packing, Storage

- Be stored in 25 L plastic barrel.
- Storage and transportation to prevent leakage and damage, not near fire.
- Storage life time is one year.
